

Building Life

RD1621 13.56 MHz Mifare Value added / Value inquiry Machine

● Description

- 512KB FLASH, keep up to 25000 transaction records, and support 5000 cardholders.
- 2 Lines, double side display remain sum, value_deducted.
- 1 relay output, 1 status input.
- Interface : RS-232-/485, server/client configuration, server computer collect database.
- 25-function key.
- For standalone or on-Line operation.
- It ensures high security and data encryption.
- Record of user information.
- When data buffer reach 90%, alarm sound will be made; buffer full (100%), Data will loss.
- Information can be DOWNLOAD.
- Operate frequency : 13.56 MHz.
- Read distance over 20mm.
- Build in RTC time module, and Li battery.
- Input Voltage : AC110V~240V.
- Operating temperature : -20°C~70°C
- Color : Charcoal gray.

● Application

Major in diverse applications such as parking lot, school, company, restaurant and payment systems management.
It also can be used for business, entertainments and so on.
